BULL INSPECTION APPLICATION

Please return the completed form to the address above in order for inspection arrangements to be made. Two inspectors or one inspector and a member of Council will carry out the inspection on an agreed date and time.

The bull must be at least 21 months old and preferably at least 24 months old, before inspection. Inspectors have the right to defer approval and request a further inspection and other tests if they are not completely satisfied on inspection.

Please apply well ahead of time so the inspectors can arrange their diaries to suit the dates given by the breeder.

Suitable Dates for inspection – please include some weekend dates:

NOTES REGARDING INSPECTION

The bull must be placed in a crush for the linear inspection part of the process.

If the bull is deemed unsafe to handle, then the inspectors may refuse to continue with the inspection and the costs incurred will be borne by the owner of the bull.

Hair samples will also be taken from the bull and his dam for DNA profiling. If no hair sample from the dam can be made available the bull inspection may not proceed – please refer to the Secretary on whiteparks@aol.com for further information.

The cost of the bull inspection is £100 to include the DNA tests. If the bull fails inspection there will be a refund of £45. An invoice will be raised to you which must be paid before the inspection can take place.

Thank you.
